Umsögn við 99. mál, frumvarp til laga um breytingu á ymsum lögum vegna banns við hvalveidum

My name is Sokolova Hanna-Maria Aleksandrovna.

It hurts me that in the 21st century people are still destroying the ecosystem, killing animals and this is allowed by law. I believe and call to stop this atrocity and ban whale hunting.

Hello! I am writing in support of a ban on whaling. I can give several arguments:

- 1) Whale meat is exported to Japan
- 2) This has a negative impact on the rating of your country, and given that every year environmental movements will develop more and more actively, it will even drive you into a dead end.
- 3) Currently, only one company is engaged in trapping, more and more people understand that this is bad, so let's support the majority.

That's why I support a ban on whale hunting.

Sincerely, Tatyana Mingaleva

October 23, 2023

Dear Members of Parliament:

I write to you today from (YOUR COUNTRY) to kindly ask you to support the bill to ban whaling in beautiful Iceland. As we have seen documented in videos recently, whaling cannot fit within the Animal Welfare Act. Additionally, whales are critical to marine ecosystems as they sequester carbon and stimulate the production of oxygen. I hope Iceland becomes a leader in protecting marine regions and species.

Thank you for your time.

I just can't believe this practise is still happening in this day and age, from someone who works in the tourism & marine conservation this horrific! I was planning a trip to see the Fjords, arora lights and other various activities at some stage, we (a large family that usually travels with 20+ will never travel here until this practise stops!

Shameless waste and abuse of nature, al just feeding one man's greed! Ljoftsson you've a lot to answer for!
